# 1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

## 1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.43.0. The release software package is comprised of the following:

- VS GUI application 1.7.43.0
- VistA M patch SD\*5.3\*845

## 1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

# 2. This Release

Please see [Features and Functionality](#) for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.43.0 and VistA patch SD\*5.3\*845.

# 3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.43.0 package and VistA patch SD\*5.3\*845.

## 3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.43.0 and VistA patch SD\*5.3\*845. The work item ID is the Jira issue number.

**Table 1: Enhancements and Defects Fixes**

<b>Work Item ID</b>	<b>Summary of Change</b>
VSE-5162	VistA: Modify SCRPW3 routine to use an additional variable when searching the patient file, appointment sub-file
VSE-5396	VistA: Issue with SDES EDIT APPT REQ
VSE-5423	VS GUI: Wrong Provider Info Displayed on PCI
VSE-5438	UI: VS GUI RTCs are Reappearing in RM Grid After being scheduled.
VSE-5656	When SDES CANCEL APPOINTMENT RPC is called, Parent MRTC request is Closed and does not return to RM Grid.
VSE-5111	VistA: Modify SDES GET APPT REQS BY IENS to normalize responses
VSE-5256	VistA: Return additional clinic data for SDES GET APPT REQ* RPCs
VSE-5264	VistA: Modify SDES SEARCH RECALL PROVIDERS to add the #403.54 IEN to the return
VSE-5324	VistA: Modify/New Version SDES CONTACT ADD/UPDATE to not require a Clinic
VSE-5375	VistA: Modify the cancellation reason file to add a "System Use Only" flag
VSE-5376	UI: Read new "System Use Only" flag to determine which cancellation reasons should be displayed in the UI
VSE-5431	VistA: Update SDES GET MISSION ACT ELIG to not return error message if PID is outside the WTS
VSE-5432	VistA: Create SDES RPC for Creating Special Needs and Preferences
VSE-5433	VistA: Create RPC for Editing Special Needs and Preferences

## 4. User Documentation

The documentation distributed with VS GUI Release 1.7.43.0 is available for download from the VA Software Document Library (VDL).

## 5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
